

Note: Deed dated April 15, 1871, Recorded Book 420 Page 300 States an iron bolt at point marked "A". Tho the driveway was dug up in that locality no bolt was found. Deed also states the bolt was 1 1/2 feet from the center of an elm tree. This tree has been blown over and cut off so that the stump is out of position, but the property line is established by the faces of the old retaining wall, and the new board fences, built by John Shallow are on his property.
